Submission of manuscript:
- Authors should submit electronic version (Microsoft word doc) of the manuscript to the editor via e-mail (editor@ijcrr.com) or through online submission.
- Accepted papers will be acknowledged and processed further, if the papers are rejected, the decision will be communicated to the corresponding author but the manuscripts will not be returned.
- Acceptance or rejection of the manuscript would be decided after the decision of editorial team
- Primary Acceptance or rejection of the manuscript for publication in journal would be informed to corresponding author within 1 week from the time of submission. Final acceptance will be given only after peer review.

Preparing a Manuscript:
- Authors should keep their manuscripts as short as they reasonably can (the total number of words should not exceed 3200).
- Page number should appear in the upper right hand corner of each page, beginning with the title page.
- The language of manuscript must be simple and explicit.
- Author’s / Co-author’s name or any other identification should not appear anywhere in the body of the manuscript to facilitate blind review.

We accept manuscript under following categories:
   a. Original Research Articles
   b. Review
   c. Short communications
   d. Perspectives (Innovative teaching methods, innovative practice approach, novel models, debates, view points)
   e. Invited articles
   f. Case reports
   g. Letter to Editor
a. Original Research Articles:
It should be arranged into the following sections:
   i. Title
   ii. Author(s)
   iii. Address
   iv. Structured Abstract
   v. Key words
   vi. Introduction
   vii. Materials and Methods
   viii. Results
   ix. Discussion
   x. Acknowledgement
   xi. References
   xii. Tables
   xiii. Figures

Title page
It should be paginated as page 1 of the paper. It should carry the title, authors’ names and their affiliations, running title, address for correspondence including e-mail address.

Title:
Must be informative, specific and short and not exceed 100 characters.

Authors and affiliations:
The names of authors and their appropriate addresses should be given.
It should be made clear which address relates to which author.

Running title:
It is a short title typed in the journal at the right top corner of right hand page of the article (except the lead page). A short running title of not more than 50 characters should be given.

Address for correspondence:
The corresponding author’s address should be given in the title page. The fax number (if available) may be mentioned. The e-mail ID of the corresponding author or the contact e-mail ID must also be provided.
Abstract and key words

Abstract:
It must start on a new page carrying the following information: (a) Title (without authors“ names or affiliations), (b) Abstract body, (c) Key words, (d) Running title. It should not exceed 250 words excluding the title and the key words. The abstract must be concise, clear and informative rather than indicative. New and important aspects must be emphasized. The abstract must be in a structured form consisting of objectives, methods, results and conclusions briefly explaining what was intended, done, observed and concluded. Authors should state the main conclusions clearly and not in vague statements. The conclusions and recommendations not found in the text of the article should not be given in the abstract.

Key words:
Provide 3-5 keywords which will help readers or indexing agencies in cross-indexing the study. The words found in title need not be given as key words.

Introduction
It should start on a new page. Essentially this section must introduce the subject and briefly say how the idea for research originated. Give a concise background of the study. Do not review literature extensively but provide the most recent work that has a direct bearing on the subject. Justification for research aims and objectives must be clearly mentioned without any ambiguity. The purpose of the study should be stated at the end. It should not exceed 500 words.

Material and Methods
This section should deal with the materials used and the methodology - how the work was carried out. The procedure adopted should be described in sufficient detail to allow the study to be interpreted and repeated by the readers, if necessary. The number of subjects, the number of groups studied, the study design, sources of drugs with dosage regimen or instruments used, statistical methods and ethical aspects must be mentioned under the section. The methodology - the data collection procedure - must be described in sufficient detail. If a procedure is a commonly used one, giving a reference (previously published) would suffice. If a method is not well known (though previously published) it is better to describe it briefly. Give explicit descriptions of modifications or new methods so that the readers can judge their accuracy, reproducibility and reliability.
The nomenclature, the source of material and equipment used, with details of the manufacturers in parentheses, should be clearly mentioned. Drugs and chemicals should be precisely identified using their non-proprietary names or generic names. If necessary, the proprietary or commercial name may be inserted once in parentheses. In case of pharmaceuticals, the first letter of the drug name should be small for generic name (e.g., dipyridamole, propranolol) but capitalized for proprietary names (e.g., Persantin, Inderal).

The routes of administration may be abbreviated, e.g., intraarterial (i.a.), intracerebroventricular (i.c.v.), intra-gastric lavage (i.g.), intramuscular (i.m.), intraperitoneal (i.p.), intravenous (i.v.), per os (p.o.), subcutaneous (s.c.), transdermal (t.d.).

**Statistical Methods:**
The details of statistical tests used and the level of significance should be stated. If more than one test is used it is important to indicate which groups and parameters have been subjected to which test.

**Results**
The results should be stated concisely without comments. It should be presented in logical sequence in the text with appropriate reference to tables and/or figures. The data given in tables or figures should not be repeated in the text. The same data should not be presented in both tabular and graphic forms. Simple data may be given in the text itself instead of figures or tables. Avoid discussions and conclusions in the results section.

**Discussion**
This section should deal with the interpretation, rather than recapitulation of results. It is important to discuss the new and significant observations in the light of previous work. Discuss also the weaknesses or pitfalls in the study. New hypotheses or recommendations can be put forth.

Avoid unqualified statements and conclusions not completely supported by the data. Repetition of information given under Introduction and Results should be avoided. Conclusions must be drawn considering the strengths and weaknesses of the study. They must be conveyed in the last paragraph under Discussion. Make sure conclusions drawn should tally with the objectives stated under Introduction.
Acknowledgements
It should be typed in a new page. Acknowledge only persons who have contributed to the scientific content or provided technical support. Sources of financial support should be mentioned.

References
It should begin on a new page. Avoid citing abstracts as references.

Papers which have been submitted and accepted but not yet published may be included in the list of references with the name of the journal and indicated as “In press”. A photocopy of the acceptance letter should be submitted with the manuscript. Information from manuscript “submitted” but “not yet accepted” should not be included.

Avoid using abstracts as references. The “unpublished observations” and “personal communications” may not be used as references but may be inserted (in parentheses) in the text.

References are to be cited in the text by superscribed number and should be in the order in which they appear. References cited only in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration.

The references must be verified by the author(s) against the original documents. The list of references should be typed double spaced following the Vancouver style. Examples are given in Annexure-II.

Tables
Each table must be self-explanatory and presented in such a way that they are easily understandable without referring to the text. It should be typed with double spacing and numbered consecutively with Arabic numerals. Provide a short descriptive caption above each table with foot notes and/or explanations underneath. The number of observations, subjects and the units of numerical figures must be given. It is also important to mention whether the given values are mean, median, mean±SD or mean±SEM. All significant results must be indicated using asterisks. Appropriate positions for the tables within the text may be indicated.

Check list for Table
- Serially numbered?
- Short self explanatory caption given?
- Columns have headings?
• Units of data given?
• „n” mentioned?
• Mean ± SD or Mean ± SEM given?
• Statistical significance of groups indicated by asterisks or other markers?
• P values given?
• Rows and columns properly aligned?
• Appropriate position in the text indicated?

Figures
Each figure must be numbered and a short descriptive caption must be provided. All significant results should be indicated using asterisks. For graphs and flow charts, it is not necessary to submit the photographs. A manually prepared or computer drawn figure (with good contrast) on a good quality paper is acceptable.
Identify each figure/diagrams on the back with a typed label which shows the number of the figure, the name of the leading author, the title of the manuscript and the top side of the figure. The approximate position of each figure should be marked on the margin of the text. Legends for figures should be typed under the figure if possible or on a separate sheet. Large/complex tables or figures may be submitted in “Final Print (camera ready) format” which will be scanned as such.

Check list for Figure
• Serially numbered? Self explanatory caption given?
• X and Y axes graduated?
• X and Y axes titled (legend)?
• Units mentioned (if necessary)?
• Different symbols/markers for different groups given?
• SD or SEM represented (graphically)?
• Statistical significance indicated?
• Approximate position in the text marked?

Short communications:
The manuscript should not be divided into sub-sections. It may have up to 1200 words (including a maximum of 5 references) and one figure or one table.
Letter to the Editor:
A letter can have a maximum of 800 words (including a maximum of 4 references) with one simple figure or table. The manuscript should not have sub-sections.

Review articles:
These should contain title page, summary (need not be structured) and key words. The text proper should be written under appropriate sub-headings. The authors are encouraged to use flowcharts, boxes, cartoons, simple tables and figures for better presentation. The total number of text words should not exceed 5000 and the total number of figures and tables should not be more than 10.

Methods
The format and other requirements are same as that of short communication.

Manuscript Submission: Checklist
- Cover letter
- Scan copy of copyright statement signed by all authors
- Title page
- Title of manuscript
- Full name(s) and affiliations of author(s); institution(s) and city(ies) from which the work originated.
- Name, address, telephone and fax numbers and e-mail address of corresponding author
- Running title
- Number of pages, number of figures and number of tables.
- Abstract - in structured form along with title, key words and running title.
- Article (double spaced)
- Acknowledgements (separate sheet)
- References
- Tables
- Figures/photographs and legends
- Permissions to reproduce published material
- Scan copy of patient consent form / Ethical committee clearance certificate (as and whenever applicable)
ANNEXURE I

Declaration and Copyright Transfer Form: To Be Signed By All Authors

To,
The Editor
International Journal of Current Research and Review (IJCRR)

Declaration and Copyright Transfer Form: To Be Signed By All Authors

I/We, the undersigned author(s) of the manuscript entitled......................................................................................
..................................................................................................................................................................................
..................................................................................................................................................................................
..........................................................hereby declare that the above manuscript which is submitted for publication in the International Journal of Current Research and Review is NOT under consideration elsewhere.
The manuscript is NOT published already in part or whole (except in the form of abstract) in any journal or magazine for private or public circulation. No part of this manuscript (referenced or otherwise) has been copied verbatim from any source. Permission to reproduce table no. and figure no.____has been obtained and submitted. Reproduced text, if any has been given in italics and within quotes.
I/we give consent for publication in the IJCRR in any media (print, electronic or any other) and transfer copyright to the IJCRR in the event of its publication in the IJCRR.
I/we do not have any conflict of interest (financial or other) other than those declared*. I/we have read the final version of the manuscript and am/are responsible for what is said in it. I/we are ready to take public responsibility for the content of the paper.
The work described in the manuscript is my/our own and my/our individual contribution to this work is significant enough to qualify for authorship.
No one who has contributed significantly to the work has been denied authorship and those who helped have been duly acknowledged.
I/we also agree to the authorship of the article in the following sequence:
## IJCRR – Instructions to Author(s)

### Author's name  Signature  Date  Place

1.  

2.  

3.  

4.  

Note:

- All authors are required to sign this form.
- No addition, deletion or change in the sequence of authors is allowed at a later stage without valid reasons.
- If the authorship is contested before publication the manuscript will be either returned or kept in abeyance till the issue is resolved.
- This form may be photocopied and used.

### Authorship and Responsibilities

- Anyone who makes significant intellectual contribution must be given authorship.
- Every author must be involved in planning, implementation and analysis of the research study and its presentation in the form of the manuscript. In case some clarification is sought, they should be able to reply to the queries.
- Authors should be ready to take public responsibility for the content of the paper.
- All the authors in a manuscript are responsible for the technical information communicated. For this reason it is necessary that all authors must read and approve the final version of the manuscript before signing the consent and declaration form.

*Conflicts of interests if any, the details must be declared in a separate sheet.*
ANNEXURE II

From Uniform Requirements for Manuscripts, www.icmje.org

Articles in Journals

1. Standard journal article
List the first six authors followed by et al. (Note: NLM now lists up through 25 authors; if there are more than 25 authors, NLM lists the first 24, then the last author, then et al.)

As an option, if a journal carries continuous pagination throughout a volume (as many medical journals do) the month and issue number may be omitted.
(Note: For consistency, the option is used throughout the examples in Uniform Requirements. NLM does not use the option.)

More than six authors:

2. Organization as author

3. No author given
4. **Article not in English**
(Note: NLM translates the title to English, encloses the translation in square brackets, and adds an abbreviated language designator.) Ryder TE, Haukeland EA, Solhaug JH. Bilateral infrapatellar seneruptur hostidligere frisk kvinne. Tidsskr Nor Laegeforen 1996;116:41-2.

5. **Volume with supplement**

6. **Issue with supplement**

7. **Volume with part**

8. **Issue with part**

9. **Issue with no volume**

10. **No issue or volume**

11. **Pagination in Roman numerals**

12. Type of article indicated as needed

13. Article containing retraction

14. Article retracted

15. Article with published erratum

16. Personal author(s)

17. Editor(s), compiler(s) as author
18. Organization as author and publisher

20. Conference proceedings

21. Conference paper

22. Scientific or technical report
23. Dissertation

24. Patent

Other Published Material

25. Newspaper article

26. Audiovisual material

27. Legal material
Code of Federal Regulations:

28. Map
29. **Book of the Bible**

30. **Dictionary and similar references**

31. **Classical material**

32. **In press**
